

**Orangeville & District Horticultural Society**

Plant Paradise is aptly named. Robb and Lorraine have created wonderful display gardens surrounding their large property. One can easily visualize plants in situ and in relation to other plants in terms of size and colour combinations. Our Society included this as one of our Annual Garden Tour stops three years ago. Both members and the public were impressed with the unusual selections, many of which Lorraine propagates herself from seed, division, or her own secret methods. She has a wealth of knowledge and Robb is invaluable as the “Jack of All Trades” in this partnership. His unique garden accessories are great natural accent pieces. Committed to gardening organically, they are constantly expanding their focus. We highly recommend a visit, especially at the height of delphinium season!

Sincerely,  
Sharon Rees,
